

durable. clear. safe.

 clarús

Made by US Acrylic

 clarus

a breakthrough in beverageware

Imagine beverageware that is unbreakable, yet luxurious—uncompromisingly durable and clear at the same time. It's called Clarus.

Developed by U.S. Acrylic and made exclusively from Eastman Tritan, a new generation, BPA-free copolyester, this unique collection of luxurious beverageware is virtually unbreakable, with unparalleled dishwasher durability. By utilizing the latest advances in material science and using the strictest manufacturing standards, we are now able to offer beverageware that has been greatly improved in every aspect compared with the drinkware of yesterday. Best of all, the entire line is made in the USA, from concept to creation.

Clarus—durable. clear. safe.
